A society has been formed for the purpose of arranging a feasible plan by which the reform may be made acceptable and put into successful operation. This society is composed and is thus exempt from a partizan character or bearing.

His cvian interest in it will result in a harmonious project which shall introduce a really lienefleent change into the working of our po-Bideal machinery. A scheme has already been reported to the Convention, which proposes to abolish the small Senatorial districts and the election of Assemblymen by towns as such, and enlarging the districts for Senators and electing the members of the Assembly by counties.

While this plan gives the election in cerregard insolute, is suggestive, and caunot be found at Clark & Tiley's News-room, tain counties to one party, which always fail to enlighted the public mind of what is add at Wm. By enlarging the districts it last session, assured as was speedily and is asserted that at least one man of known ability could, by this plan, he elected from every district. In the districts which are at present unchangeably in the hands of the democrats, the republicans would not be entirely unrepresented, and in the interior counties, where the republicans have everything their own way, the democrats could, by concentrating their votes upon a single candidate, be heard by representatives of their own choosing.

It is very evident that public sentiment is rapidly converging to the adoption of the principle in some form; and the outlier antive hody that first gives it a practicable and secure shape and sets it in successful operation will perform a work creditable to itself and favorable to the perpetuity of popular government.
